ESTIVEN PADILLA SANTOS

SYSTEMS AND COMPUTING ENGINEER

Software developer centering on web development, with over 3+ years of developing on my own with a focus on building engaging and accessible digital experiences.

Project Experience

PrestameSoft API.
https://github.com/EstivenPad/PrestameSoft.Backend

(ASP.NET Core / Clean Architecture / CQRS)

PrestameSoft API, as part of one of my side projects, is designed to provide a comprehensive, scalable, and secure solution for managing loans. This RESTful API will enable lenders and borrowers to efficiently handle their loans, approvals, repayments, and tracking through a simple and intuitive interface.

PrestameSoft Mobile.
https://github.com/EstivenPad/PrestameSoft.Mobile

(Expo / React Native / Redux)

PrestameSoft Mobile is specifically designed to streamline and simplify the management of fortnight loans. This robust application connects seamlessly with a RESTful API, enabling users to efficiently manage their loans with bi-weekly payment schedules. The app provides a user-friendly interface for tracking loan details, payment schedules, and balances, ensuring users stay informed and in control of their paid-up capital.

Green Field Park.
https://green-field-park.netlify.app

(Astro / HTML & CSS / React)

A single-page application (SPA) about a real estate project built using Astro that implements features like responsive web design and the management of a contact form that integrates with email notifications.
